

CLAIMS

I claim:

1. A utility belt for baby equipment comprising:

an elongated belt member having a first end, a second end, an

5 outer surface and an inner surface;

attachment means mounted on said belt for removable attachment

of said first end and said second end of said belt member;

first receptacle means removably mounted on said attachment

means;

10 first panel means having an upper edge, a lower edge, a first side

edge and a second side edge, with said lower edge of said first panel

means connected to said outer surface of said belt member, with said

first side edge and said upper edge intersecting to form a first corner;

with said second side edge and said upper edge intersecting to form a

second corner; with said first corner and said second corner each

15 connected to said belt member thereby forming openings between said

first panel means and said outer surface of said belt member along said

first side edge of said first panel means, along said second side edge of

20 said first panel means and along said upper edge of said first panel

means.

2. The utility belt for baby equipment as claimed in claim 1 in which said

attachment means comprises:

first attachment means disposed on said belt member for

AMENDMENT

removable connection of said first end and said second end, with said first attachment means disposed on said outer surface of said belt member;

second attachment means disposed on said inner surface of said belt member with said second attachment means cooperating with said first attachment means for removable connection of said first end of said belt member and said second end of said belt member in order to encircle the waist of a user;

3. The utility belt for baby equipment as claimed in claim 1 in which said first panel means is made of a flexible mesh material.
4. The utility belt for baby equipment as claimed in claim 1 in which said upper edge of said first panel means further comprises:  
elastic means.
5. The utility belt for baby equipment as claimed in claim 1 in which said first receptacle means is generally cylindrical.
6. The utility belt for baby equipment as claimed in claim 1 in which said first receptacle means has a generally circular bottom.
7. The utility belt for baby equipment as claimed in claim 1 in which said first receptacle means has an upper edge and in which said upper edge of said receptacle means further comprises:  
elastic means.
8. The utility belt for baby equipment as claimed in claim 1 further comprising:

- second receptacle means disposed on said outer surface of said belt member.
9. The utility belt for baby equipment as claimed in claim 1 in which said second receptacle means comprises:
- 5                   a generally flat back panel.
10. The utility belt for baby equipment as claimed in claim 1 comprising:  
                      second panel means with said second panel means having at least three edges and with said three edges attached to said inner surface of said belt member.
- 10 11. The utility belt for baby equipment as claimed in claim 1 further comprising:  
                      first pocket means disposed on said inner surface of said belt member with said first pocket means having an inner surface;  
                      plastic film means disposed on said inner surface of said first pocket means.
- 15 12. The utility belt for baby equipment as claimed in claim 1 further comprising:  
                      second pocket means with said second pocket means disposed on said inner surface of said belt member.
- 20 13. The utility belt for baby equipment as claimed in claim 1 in which said second pocket means comprises:  
                      at least three edges and with said second pocket means attached to said belt member along said three edges.

- 
14. The utility belt for baby equipment as claimed in claim 1 in which said attachment means comprises:
- a loop member.
15. The utility belt for baby equipment as claimed in claim 2 in which said second attachment means comprises:
- a hook member.
16. The utility belt for baby equipment as claimed in claim 1 in which said belt member comprises:
- an upper edge;
- 10 a lower edge, and
- a pair of side edges.
17. The utility belt for baby equipment as claimed in claim 16 in which said belt member further comprises:
- a generally concave upper edge, and
- 15 a generally convex lower edge.
18. The utility belt for baby equipment as claimed in claim 16 in which said side edges of said belt member further comprise:
- rounded corners.
19. The utility belt for baby equipment as claimed in claim 1 in which said belt member further comprises:
- 20 third panel means disposed in general alignment with said first panel means with said third panel means made of a mesh material.
20. A utility belt for baby equipment comprising:

5

an elongated belt member having a first end, a second end, an outer surface and an inner surface;

attachment means mounted on said belt for removable attachment of said first end and said second end of said belt member;

first receptacle means mounted on said elongated belt member;

first panel means having an upper edge, a lower edge, a first side edge and a second side edge, with said lower edge of said first panel means connected to said outer surface of said belt member, with said first side edge and said upper edge intersecting to form a first corner; with said second side edge and said upper edge intersecting to form a second corner; with said first corner and said second corner each connected to said belt member thereby forming openings between said first panel means and said outer surface of said belt member along said first side edge of said first panel means, along said second side edge of said first panel means and along said upper edge of said first panel means.
